	\$310 22
Due Baptist Society, \$1.78	
Derived from interest on Parsonage fund,	\$312 00

## SUPPORT OF POOR.

Paid Thomas Elkins, for one cord of wood for Jos. Robinson, County pauper,	\$3 00
J. P. Marshall, for one cord of wood for Jos. Robinson,	3 25
Bakie Brothers, for assistance rendered Gilman L. Dow, County pauper,	1 50
M. J. French, for assistance rendered Gilman L. Dow,	4 00
Stephen S. Webster, County pauper,	6 00
S. E. Woodman, for cash paid out for Peter Bushway, County pauper,	\$10 00
C. N. Colbath, for coffin, box and robe for Peter Bushway,	12 00
J. W. Collins, for assistance rendered Johanna Woodbury, County pauper, 52 weeks to March 1st, 1882,	52 00
T. O. Reynolds, for medical attendance, Maria Curoux, County pauper,	2 00
W. G. Wilson, for assistance rendered Maria Curoux,	3 00
Sam'l E. Woodman, for assistance rendered Maria Curoux,	3 00
M. J. French, for assistance rendered Benjamin Severance,	2 00
A. C. Chase, for assistance rendered Benjamin Severance,	2 00
William Winslow, for assistance rendered Charles Carter, to March 1st, 1882,	28 00
M. J. French, for assistance rendered Joseph Webster,	6 00
Town of Epping, for boarding Emma Howe and two children, 8 weeks,	20 00
J. H. S. Sanborn, for one cord of wood for Joseph Webster,	3 25
	<hr/>
	\$161 00

---

Received from the County of Rockingham, for assistance rendered County paupers,	\$108 75
---	----------

---

Total support of town poor,	\$52 25
-----------------------------	---------

### SALARIES OF TOWN OFFICERS.

Paid Sam'l E. Woodman, services as Selectman,	\$50 00
"                    " as Overseer of Poor	10 00
John H. S. Sanborn, services as Selectman	26 00
Daniel L. Goodwin, services as Selectman,	26 00
Louis G. Hoyt, services as S. S. Committee,	25 00
"                    certificate and posters,	1 00
Walter S. Clark, services as Town Clerk,	25 00
Moses J. French, services as Town Treasurer,	25 00
B. F. Cram for collecting \$5618 91 at 2 per cent.,	112 38
John H. Furber, services as police one night,	1 50
C. E. Cilley, services, as police one night,	1 50

---

\$303 38

### HIGHWAYS AND BRIDGES.

Paid Gilman Clough for 1960 feet of bridge timber, district No. 8, for 1880,	\$36 00
John H. Furber, labor on highways and care of road scraper,	16 30
C. C. S. Stevens, for castings for road scraper,	11 90
Charles Barber and others, for labor on highway in districts No. 1 1-2 and 2,	5 20

---

\$69 40

### DISTRICT No. 1.

Paid Sanford Whipple, Highway Surveyor, for labor on highways,	36 19
Sanford Whipple, for breaking roads, winter of 1881-2,	30 90

---

Paid W. L. Norfolk, for breaking roads and labor on highway, spring of 1881,	2 00
	<hr/>
	\$69 09

## DISTRICT No. 1 1-2.

Paid Edgar S. Prescott, Highway Surveyor, for labor and material on highways,	\$85 50
Edgar S. Prescott for breaking roads, winter of 1881-2,	19 70
J. H. S. Sanborn, for breaking roads winter of 1881-2,	15 82
J. H. S. Sanborn for breaking roads, spring 1881,	6 30
J. H. S. Sanborn, for 774 feet of bridge timber,	11 61
E. S. Prescott, for 1018 feet of bridge tim- ber,	14 76
John W. Sanborn, for 2234 feet of bridge timber,	43 00
John W. Sanborn, for poles and rails,	50
Joseph Judkins, stones for bridge,	2 00
	<hr/>
	\$199 19

## DISTRICT No. 2.

Paid Charles Barber, Highway Surveyor, for labor and material on highway,	75 39
Charles Barber, for breaking roads, winter of 1881-2,	28 98
	<hr/>
	\$104 37

## DISTRICT No. 3.

Paid John B. Hanson, Highway Surveyor, for la- bor on highway,	\$30 90
John B. Hanson, for breaking roads, win- ter 1881-2,	14 75
	<hr/>
	\$45 65

## DISTRICT No. 4.

Paid Daniel C. Bean, Highway Surveyor, for labor on highway,	\$28 22
Daniel C. Bean, for breaking roads, winter of 1881-2,	8 78
Thomas Elkins, for breaking roads, spring of 1881,	12 00
	<hr/>
	\$49 00

## DISTRICT No. 5.

Paid George E. Bailey, Highway Surveyor, for labor and material on highway,	121 65
George E. Bailey, for breaking roads, winter of 1881-2,	25 65
	<hr/>
	\$147 30

## DISTRICT No. 6.

Paid Charles B. Clark, Highway Surveyor, for labor and material on highway,	54 65
Charles B. Clark, for breaking roads, winter of 1881-2,	46 39
	<hr/>
	\$101 04

## DISTRICT No. 7.

Paid Edward L. Cheney, Highway Surveyor, for labor on highways,	78 14
E. L. Cheney, for posts, rails, and bridge timber,	5 73
E. L. Cheney, for breaking roads, winter of 1881-2,	45 77

MOSES J. FRENCH, Treasurer.

KINGSTON, March, 2, 1882.

We, the undersigned, have examined the foregoing accounts of the Selectmen and Treasurer for 1881, and find them correctly cast and proper vouchers for the same.

CHAS. B. CLARK, }  
JOHN W. SANBORN } Auditors.

ANNUAL REPORT  
OF THE  
SUPERINTENDING SCHOOL COMMITTEE,  
FOR THE YEAR ENDING MARCH 1, 1882.

---

Judging from results, we should say that there has been good and systematic labor performed in our schools this year, and we are fortunate in not having to exclude a single district.

In District No. 1, Miss Austin succeeded in making a happy impression upon her pupils from the outset and was thus enabled to accomplish the most gratifying results. The only fault we have to find with this school is attributable to four brick walls which are unfortunately so near to the centre of the school-room that the scholars within are confined to very narrow limits, in some instances three having to occupy a single seat, thereby rendering it impossible to preserve that order and decorum so essential to the welfare of a school. Scholars should be separated from each other as much as the nature of school-rooms will permit, and when three pupils are compelled to occupy a seat poorly adapted for two it is high time for necessity to become the mother of invention, if it is ever going to be.

District No. 2 has had the benefit of the services of a teacher of many years' successful experience, whose reputation is well-known to our towns-people. Her time has been assiduously devoted to the interests of the school with the

best of results. The schoolhouse has been remodeled and refurnished with the best of school furniture, thus making as desirable a school property as can be wished for.

District No. 3 has been particularly fortunate in the selection of teachers for several years past, and though at the outset of the year we feared it might meet with a different experience by the selection of an inexperienced teacher, we were soon convinced that Miss Sanborn possessed the requisite qualities of a good teacher, which she readily adapted to the needs of her school-room.

District No. 4 is said to be in a flourishing condition and continues to act as a kind of ornamental appendage to the town of Newton.

District No. 5 has made more progress than any of the other districts. We do not mean by this that they are farther advanced, but considering their position when Miss Noyes took the school and their position when she left it, their progress has been something remarkable. At the beginning of the year they were unquestionably a little backward; at its close they were equally as far forward, demonstrating the fact that if one school is less advanced than another it is owing to their inferior privileges and not to their want of material from which to develop scholarship. The people of this district, appreciating the services of Miss Noyes, raised sufficient funds to prolong the second term about four weeks.

District No. 6 was fortunate in securing two teachers of long experience and of unquestionable ability. The result has been the placing of the school on a "paying basis," as the financiers would say, and with a continuance of such good instruction for another year "handsome dividends can be realized." The scholars have a good start in the right direction and with proper discipline next year they can take a rank with any of our schools. We would suggest that with the exception of this district every district in town has had the benefit of the continuous service of their respective

teachers throughout the year, thereby accomplishing more than can possibly be accomplished by a continual change of teachers as the seasons come and go.

During the past year we have secured a uniformity of arithmetics by the introduction of the Fish-Robinson series. As we noted in our last report the need of change was not apparent in Districts Nos. 2 and 3, but in the other districts a great variety of text books were in use, so that systematic teaching was an impossibility. Negotiation enabled us to make an even exchange, so that Districts Nos. 2 and 3 did not have to suffer for the good of the other districts. We have now a complete and uniform series of text books throughout the town, and to prevent a repetition of that confusion consequent upon a diversity of text-books we have adopted a rule prohibiting the use of any but the prescribed books now in use. Our successors cannot but see the importance of firmly adhering to this rule.

The advantage of a uniformity of text-books undoubtedly justified the great changes we made last year and this, but to answer complaints often heard on the part of parents to the effect that committees "are always changing books," and that because a book was good enough for a parent when he was a boy it is good enough for his son, I wish to make a few observations, which will in part apply also to the opposition manifested in different sections of our town to the internal arrangements of our schoolhouses.

*Changes, Wise and Otherwise.*—We can appreciate the position of parents who complain of frequent changes of books when the books displaced are of modern authorship, and the only reason given for the exchange is that the new book is a "better book." We believe it is more desirable to have a book of poorer methods and understand them, than to have one of slightly better methods and spend a term in getting accustomed to them, only to meet with another change upon the advent of a new committee. But when we see a young man go to his father bearing the ever joyful

tidings that the teacher says he must buy a new book to displace the antiquated compilation he is then using, and which his ancestors have used before him, and see his father look with a contemptuous smile upon him and say, "Well, that book was good enough for me when I was a boy and I guess it will do for you," we make up our minds that the father either does not know much about the subject upon which the book treats and is desirous that the son shall acquire about the same amount of information, or that he fancies a man grows wise by growing old without taking any particular pains about it. We have little compassion for a man who identifies age with knowledge and experience, and imagines to himself that because he is nearing the allotted age of man he is nearing that period of wisdom when a man knows all there is worth knowing—and a little more.

Because an instrument is good enough for us to accomplish a certain result is not a reason why it will be good enough for our children after us. In mechanical appliances the logic of events forces everyone to admit the great changes that have been brought about within the last thirty years, and the logic of necessity forces everyone to adopt them. It was but a few years ago when, early in the day, the father and son went into the grass-field with their scythes and stroke after stroke laid it in swaths, returning a little later to spread that which they had previously mown. Their work began in muscle and ended in muscle. The scythe, except for minor purposes, has long ago disappeared from the homestead farm, or has been left by the father hanging on some dying fruit tree as a reminder to his son that what was "good enough for the father when he was a boy is *not* good enough for his son." Our good mothers will remember the many hours they have spent in dipping wicks into tallow to furnish their households with the luxuries of candles; the many threads they have spun on the old spinning wheel, and many other duties which are now performed by the exact and cunning fingers of machinery. The lapse of but a single

year has witnessed the power of turning night into day by the hidden power of electricity; and how with these evidences of mechanical progress continually before us can we be blind to that intellectual progress which has enabled them to be brought about. The mechanic's mind is not the only mind that has been at work for these last few years, but the minds of teachers and educators have been employed in their respective fields, and the methods they now employ differ as much from the methods employed thirty years ago as the mowing machine differs from the scythe, the sewing machine from the needle, or the pegging machine from the shoe maker's hammer.

We have heard complaint that our new arithmetics were too hard, the same question being put in so many different ways. But therein lies their special merit. A pupil is made to think for himself and draw his own conclusions from a given statement of facts, and in this way he is gradually acquiring the habit of thought and developing the reasoning faculties, which are so essential to his welfare in life. He will soon realize that he has a mind of his own, and that it is the noblest endowment God has conferred upon him, and the only one which places him above the brute creation. Thus will he become a useful member of society, and thus will he carry out the grand design of our common school system.

This sentiment of opposition to changes in our school discipline or schoolhouses simply because it introduces elements which were not known in our boyhood days, and because it entails some small expense, is not consistent with our conduct in the more practical affairs of life, and is therefore unreasonable.

We would call attention to the large number of pupils included in the Roll of Honor this year, as it is larger than that reported in any previous year for many years, and larger than that of last year by forty. Nothing better demonstrates the interest of pupils in their respective schools than

the large attendance of those who have not been absent for a single half-day during a term.

Other important information will be found in the annexed table.

LOUIS G. HOYT.

Kingston, N. H., March 1, 1882.
